* Also available in individual 10 packs

IMPACT STICKS 2 END RINGS

Bend, snap and shake – this is how a light stick activates. However, due to advancements in design, our Impact line of chemical light devices activate with a forceful throw against a wall, down a flight of stairs or any number of other applications. Ideal for confined space, emergency egress or tactical situation.

| PRODUCT DESCRIPTION | PART # | QTY | DURATION |

VISIBILITY IN A POWER OUTAGE

Our world famous chemical light sticks are made even more useful with the right accessory. From the handle to the cone adaptor, magnetic base and light shield, pairing our light devices with an accessory can make all the difference. Directing traffic, providing just the right amount of light, and having both hands free to get the job done are just some of the benefits.
