

Evacusafe EvacPRO+

Every minute matters when it comes to saving lives.

That's why companies are turning to quick-to-deploy, life-saving equipment like the EvacPRO+.

EvacPRO+ is an ultra-strong evacuation pad, safety-tested to over 880lbs. It is ergonomically designed to help the operator slide a heavier person across the floor during an evacuation allowing both you and the patient get to safety quickly.

Best for use in units that commonly treat overweight individuals, the EvacPRO+ rolls up for convenient, compact storage and comes with 6 color-coded straps to keep the patient safely in place. There are several pulling/maneuvering straps to help the operator move effectively and is made with durable, flame-retardant, wipe-clean material for infection reduction. Built-in pockets allow easy use of body boards and support poles. Plus, the sliding plastic base is easy to replace on your own.
